O.H.M. COLLECTION

LB6

Mechanical movement, manual winding with Hours, Minutes & Small Seconds functions.

Caliber AN731B, obtained from FHF 964 produced in 1956. Smooth, domed dial with applied indexes. Case with antiglare treated sapphire crystal on top and sapphire crystal in the see-through screwed back.

TECHNICAL SPECIFICATIONS :

- Case and Buckle: Stainless Steel 316L
- Water Resistance: 10 ATM
- Diameter: 43 mm
- Thickness: 10.5 mm

VERSIONS :

- Stainless Steel 316L

STRAPS AVAILABLE :

- 22mm leather strap with stainless steel tang buckle
- 22mm vintage calf strap with stainless steel tang buckle

LIMITED TO 225 PIECES PER COLOR
MOVEMENT FROM 1956

The LB6 collection features original movement FHF 264 from 1956. Mechanical movement, manual winding with Hours, Minutes & Small Seconds functions.

The movement is decorated with Adolci nickerled finishing. Armand Nicolet's expert watchmakers integrated it with the shock absorber and made many other modifications so that this masterpiece could achieve modern technical standards.

Technical characteristics: Flat Hair-Spring, Lever escapement, 17 jewels, 36 hour power reserve and 18,000 vibrations per hour.

Caliber AN0731B, obtained from FHF 264 produced in 1956 and modified in 2017.

MOVEMENT FROM 1967

The movement has been integrated with a shock absorbent system.

The upgrade makes this movement a perfect mix of great Swiss mechanical tradition with the most modern techniques of watchmaking.

The ticking produced by 21,600 vibrations per hour creates a magic and charming sound that is typical of traditional mechanical timepieces. The 25 jewel calibre has been finely decorated with "Cote de Genève" finishing and embellished by "Perlage".

Technical characteristics: Flat Hair-Spring, Swiss "ancré" escapement, 25 jewels and 21,600 vibrations per hour. Derived from AS-1883.
